DNS Server configuration

Procedure:

1. Make connections as in topology.
2. Add DNS ip as 10.0.0.1 to PC & 10.0.0.2 in F0/0.
3. Add 10.0.0.1 as static IP for server.
4. Go to services → DNS and add:
Type A, abc.com, 10.0.0.1. Turn service on
5. Go to PC and access abc.com from browser.

Observation:

DNS works as expected and website is accessed.

Topology:
